

REMIEDIATING SITES IN NEW JERSEY UNDER SRRA LAW: Roles, Responsibilities & Benefits

June 22, 2015 | Montclair, NJ | 8:30 a.m. - 1:00 p.m.

Registration Fee: \$185 | Multi Fee: \$175 | LSRPA Fee: \$175

With the advent of the Licensed Site Remediation Professional program in 2009, a whole different paradigm for site remediation evolved. In lieu of requiring the NJDEP approval for every phase of cleaning up contaminated sites, the LSRP was given the authority to perform the studies and the remediation as well as to declare the site as having been satisfactorily cleaned up, all without NJDEP oversight for most contaminated sites in New Jersey.

The Site Remediation Reform Act (SRRA) not only affects potentially responsible parties, local government officials, property purchasers and developers, but all those professionals involved in remediating and developing sites in New Jersey. **This half-day course** is designed to discuss the significant responsibilities associated with the SRRA law and will focus on those individuals who have not been routinely involved in LSRP matters, but now find themselves being able to benefit from this program!

WHO SHOULD ATTEND:

This course will be of interest to developers; industrial and commercial companies; land use, transactional and environmental attorneys; county and municipal local officials; anyone involved in Economic Redevelopment Authorities; realtors and property owners; responsible parties; and all those interested in learning more about the ins and outs of the SRRA.

TOPICS TO BE DISCUSSED:

- ◆ Overview of the evolution of the LSRP Program
- ◆ New process versus the old process
- ◆ Roles of the Remediating Party, the LSRP, the NJDEP, & the NJ Site Remediation Professional Licensing Board
- ◆ How all of this affects remediating parties, developers purchasing contaminated properties, realtors, land use, environmental and transactional attorneys, industrial and commercial entities.
- ◆ The program will conclude with a panel discussion which will include Attorneys, Consultants, Remediating Parties and Developers.
